

American Baptist Men Disaster Relief Information

The homeowner should expect one of our members to call and schedule a time to look and review what work needs to be done. You will receive a phone call and or text from one of our people about getting into or on your property for the requested work. The call will probably be from another area code so please answer.

We will make 3 attempts to contact you and if we make no contact, we will assume your job is completed and your request will be removed from the active queue.

Expect our people to wear orange. The American Baptist Men Disaster Relief will never charge for any of our services.

We do not do mobile homes because there is no way to do a complete tear out without compromising the integrity of the structure, nor do we offer services for commercial or rental property (unless signed by renter and owner for rental property).

The signed Mission request is not a guarantee of services. The date your request is received is not the priority by which work is done. We will make every effort to get to your job in a timely order.

Once we arrive and your work begins, our volunteers will do the work discussed with our assessor and you unless we deem other work may be needed or we are unable to do the work. If your home requires a mold retardant (shock wave), you will be required to be out of the house during the application process for 4 hours. If we encounter **asbestos** in your job, work will be halted, and disposal will be at the owner's expense.

Van Peters, State Director
American Baptist Men Disaster Relief for Great Rivers Region
